ATA Chapter: 11-00-00 Placards and Markings
Interior / Exterior Placards / Livery Changes

The AMES Part21J Design Organisation together with the AMES PLS Part21G Production Organisation provides the full range of Interior Placards / Exterior Decals and Livery Designs from single signs up to complete aircraft kits.

The AMES designed Interior- and Advertising Placards are printed on state of the art materials fully burn test certified in accordance with §25.853. To guarantee best durability and first class appearance the Placards are protected by an additional layer of Lexan laminate.

Exterior Placards are thermally printed onto vinyl with a Tedlar over-laminate. These Exterior Placards are fuel resistant and do not fade or yellow with age.

Livery Changes designed and approved by AMES Part21J DOA are based on supplied industrial design studies and consider all customer design and appearance requirements. Painting templates are provided on request.
