

Welcome to the 31<sup>st</sup> edition of 'AMES High', which aims to keep customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

## AIX 2017

Thank you for visiting us on the AIX in Hamburg! The AMES delegation was delighted to meet many of our customers and talk about existing and upcoming projects and co-operations. Also the special Styrian Evening provided a perfect networking platform while enjoying some traditional Styrian snacks, drinks and music.

## New Products – B737 Sky Interior MCD available at AMES!

To keep up with the increasing demand for Boeing 737 "MAX" and also Sky Interior Products we have developed our new Moveable Class Divider (MCD).

A prototype of our latest development was also presented to interested customers at the AIX in Hamburg. Please contact us for further details or proposals.

### Lead Time and Process Improvements in Engineering and Production

Always striving for the world best turnaround times for our customers, AMES continuously enhance the internal, EASA approved DOA and POA processes.

AMES is happy to offer the shortest lead times in the market for total packages of engineering and productions services for your cabin conversions and retrofit programs.

Please check us out and send your request for DOA and interior parts packages to [services@ames.co.at](mailto:services@ames.co.at)

### Increased capacity and new members of the AMES family

Andrew Kirby joined the AMES Ireland Part 21 team and after the initial training he will be the 4th full time employee operating in our Dublin Office. Also introducing Ivan Marqueta and Filip Matejko, who recently joined our Engineering team in the Head Office in Peggau, Austria. This increases our capacity in the electric/avionics and interior fields.

Always striving for the best turnaround times for our customers we are also planning to further increase manpower in our production organization in the coming months.
