

Welcome to the 37th edition of 'AMES High', which aims to keep you, our customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

AMES Production Approval since 2009

This year we celebrate the 10th birthday of our EASA POA. We are now able to support YOU, our customers with hardware for your cabin and passenger requirements and are proud to continue the high level of Customer Service that AMES is well known for.

With over 1200 deliveries to our customers during this period, our product portfolio has grown to cover a multitude of cabin systems that we have been requested to provide. We are now able to satisfy customer needs from fast cabin changes, complete retrofit programs to customised additional cabin requirements like MCDs, placards, cargo bags or complete crew rest systems. All are now in our portfolio today.

New Products

We are constantly increasing our product range for various aircraft types and designs. Latest additions to our standard AMES products are; the new Airbus A320 family MCD and a certified smart glass windscreen for a customer project.

A320 Family MCD

Smart Glass Windscreen

New record number for our CAMO Services

Our CAMO team has now grown to a total of 18 highly qualified staff in our offices in Neusiedl-Austria and Dublin-Ireland. Together, they have successfully managed a total number of 197 transitions in 2018, a new record for AMES! The average yearly number lies in a range of 100 up to 120 transitions per year. The additional staff and our new streamlined processes have all made this possible.

The Bombardier Q400 has been included into our capability list of our EASA Part M CAMO Approval in December 2018. We cover now 57 different aircraft types, from the Diamond DA 20 Series up to the Boeing B747. For further enquiries please contact us on camoservices@ames.co.at.

For more information please contact us via e-mail on services@ames.co.at, or see our website on www.ames.aero
