

AMES HIGH

Newsletter No. 64
December 2025

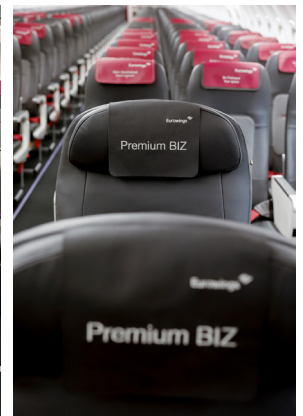

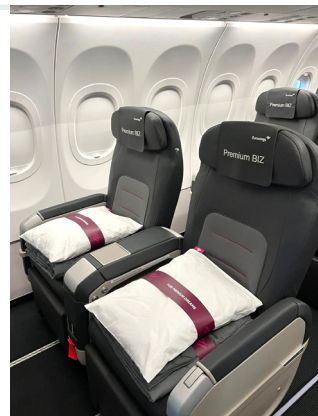

AMES
aerospace

Welcome to the 64th edition of 'AMES High', which aims to keep you, our customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

Increasing Demand for AMES certain STC privilege

Another great example of how our customers benefit from our in-house certain STC privilege.

Our engineering and certification team led the development of a new dual class cabin layout and successfully obtained EASA airworthiness approval for the integration of the Premium BIZ Class on Eurowings' medium-haul A320 fleet. Following the successful modification of the first aircraft the privilege STC was issued in record time and the aircraft is already back in operation.

Unique Cabin Branding

Our team played a key role in supporting a special branding project for Condor Airlines and German Football Team Eintracht Frankfurt. With a wide range of engineering and production services we contributed to the unique cabin branding of D-ASGE. Thanks to our exceptional flexibility and a strong "can-do" mindset, the project was completed in an impressively short timeframe. The result is truly unique and definitely speaks for itself.

Wishing you a very Merry Christmas and a successful 2026!

We are looking back on a year with positive developments for us and the entire aviation and travel industry worldwide. Despite economic and geopolitical uncertainties, the demand for air-travel has increased tremendously over the past year and continues to be very strong. To cope with the increasing demand our expanded production facility in Austria went fully operational and the rework of our existing production

space and office infrastructure was completed. The opening ceremony marked also our **20th Anniversary**, a milestone that we are especially proud of.

Supporting you with the required flexibility and high-quality services, continues to be our core values at the **AMES Group**, enabling us to stay a reliable partner for you in 2026 and beyond.

Christmas Holiday closing

Between 22nd of December and 02nd of January our offices and production facility will be closed. The AMES team is available for your projects again as of **January 05th 2026**.
