

Welcome to the 51st edition of 'AMES High', which aims to keep you, our customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

New Products and Services

**B737 PSU mounted
Class Divider for
staggered installation**

Our latest interior product development offers a flexible class divider solution for asymmetrical cabin configurations like a typical 189 layout on Boeing B737s. The product is available for Boeing NG Interior and Boeing Sky Interior (BSI) cabin lining. PSU mounted side panels are picking up existing PSU rails and can be installed without further modifications to the aircraft. The center aisle header can be mounted to a number of predefined locations in the forward tapered cabin section and account for staggered LH and RH seat positions. Various colour schemes and other corporate branding related customizations are available.

Wishing you a very Merry Christmas and a successful 2022!

The past two years have brought many unexpected and challenging situations for the entire Aviation and Travel Industry, worldwide. Unfortunately, some of these are expected to continue into the new year. Despite the challenging circumstances across the industry, supporting you, our customers, with the required flexibility and high-quality services, remain to be core values for the AMES Group. We will continue to provide our excellent services and to work with our partners to achieve their goals and standards into 2022 and beyond.

Christmas Holiday closing

Between 23rd of December and 02nd of January our AMES offices and production facility will be closed. Our Team is available for your projects again as of **January 03rd 2022**.
